

# Notification of Work

## *Canadian Navigable Waters Act*

Cenovus Energy Inc. hereby gives notice that a submission has been added to the Navigable Waters Registry pursuant to the *Canadian Navigable Waters Act* for public comment described herein and its site and plans.

Pursuant to paragraph 10(1)(b) of the said Act, Cenovus Energy Inc. has deposited with the Minister of Transport, on the on-line Common Project Search Registry (<http://cps.canada.ca/>) and under registry number 12461, a description of the following work, its site and plans:

Cenovus proposes to install new above-ground pipelines over Turtle River to connect the existing Edam East Thermal Facility with a new oil reservoir. The new infrastructure will include at least four pipelines constructed in a single pipeline rack. These pipelines will transport steam and fuel gas to the oil reservoir and bring back an oil mixture and casing gas to the Edam East Thermal Facility. The pipeline crossing at Turtle River will be located at NW-07-048-19 W3M and has been designed as a clear span crossing, which will be supported by steel piles on either side of the river. These piles will be outside of the riverbank area, and the pipeline will be at least three metres above the high-water mark of Turtle River. Construction is anticipated to begin as early as Q4 2025.

Cenovus anticipates no impacts to navigation on Turtle River because the pipeline will be high above the river and no infrastructure will be in the river. Comments regarding the effect of this work on marine navigation can be sent through the Common Project Search site mentioned above under the Comment section (search by the above referenced number) or if you do not have access to the internet, by sending your comments directly to:

**Brian Davies**

Senior Surface Land Negotiator
